

We would like to thank you for purchasing one of our unique swimming pool borders. You will be amazed like many of our customers at the transformation it has made to your swimming pool.

After Care

Once your border is fitted you will want to look after it. The first thing to remember is there is NO REQUIREMENTS for liner cleaner chemicals! Quite simply use a soft sponge and pool water to clean your border twice a week in the summer and once a week in the winter for well maintained private pools. For communal pools and pools of let properties more frequent cleaning may be required dependent on usage. If you find a sponge and pool water is not removing all the staining then use washing up liquid on a sponge, failing that Clif liquid on a sponge. Under NO CIRCUMSTANCES use harsh, abrasive cleaning products on your border as you WILL DAMAGE the 'non-stick' coating of your border.
